Dreams start small...

## MEASURE LITTLE FEET, AS EASY AS 1 - 2 - 3

1. Stand your child on the chart with heel where indicated. Gently press down on the top of foot to ensure it is flat.
2. Read the line past the longest toe. Be sure to measure both feet, one might be longer.
3. Add 1/4" of extra space to allow for growth and comfort. The shaded region the line falls in will determine the correct shoe size.
